## Tres University of Colorado Colorado Springs

# Financial Aid Distribution 

Fall 2011 Undergraduates in Aid Year 2011-2012

Institutional Research

March 2013

## Introduction

Drawn entirely from the Financial Aid data compiled specifically for reporting to the Colorado Department of Higher Education and the nation-wide Integrated Postsecondary Education Data System (IPEDS), this is the second internal Institutional Research report to summarize the distribution of financial aid among our students. ${ }^{\text {. }}$

New this year is additional content regarding financial aid trends and student persistence; however, we have excluded graduate students because their aid profiles differ substantially and in 2011 the federal government eliminated subsidized stafford loans for graduate students, thus most of their aid is in the form of unsubsized loans leaving little to analyze.

Although aid is distributed and redistributed throughout the year, the student population in this analysis is limited to undergraduates enrolled at the end of the Fall 2011 semester. Their financial aid awards are extracted from the final 2011-2012 aid award year, including spring disbursements.

The report is intended to satisfy the need for greater transparency and to inform campus decision-makers as well as students and their families about types and amounts of aid.

## Undergraduate Financial Aid

First, a brief primer on Cost of Attendance, Need, and Estimated Family Contribution - three vital calculations that determine a student budget and their eligibility for financial aid. The primer is followed by brief summaries of aid sources and aid types. The Office of Institutional Research is responsible for the methods used in this report. For the best explanation of financial aid, always refer to the Office of Financial Aid at www. uccs.edu/finaid.

## Estimating Costs and Need

The cost of attendance includes room and board, textbooks, transportation, and other living expenses in addition to tuition and fees for Fall and Spring terms. At UCCS, the cost of attendance is similar to the budget assigned to each financial aid applicant. It is also similar to the "net price" for attending the institution.

The expected family contribution (EFC) is calculated by the US Department of Education and uses information reported in the FAFSA when students apply for aid. EFC incorporates several factors for dependency, family size, and individual and household income. Both the cost of attendance and estimated family contribution are used to calculate need.

Need is the cost of attendance minus the expected family contribution; it is calculated for all students who apply for financial aid.

In turn, all aid can be categorized as either need-based or non-need based. Need based aid implies eligibility criteria in which students' financial circumstances are taken into account. Non-need based aid is distributed based on students' merit or ineligibility for need based aid. Non-need based aid includes merit-based scholarships, PLUS loans, unsubsidized Stafford loans, and non-need Colorado work study. Most non-need aid can be used to meet a student's need if need-based aid has not covered their costs. Remaining costs are considered unmet need.

Among 8012 undergraduate students ${ }^{1}$ in Fall 2011, 78\% applied for aid and $66 \%$ received financial aid. The average cost of attendance was $\$ 20,077$ and the average family contribution was $\$ 11,172$. The average need was $\$ 12,873$ and the average amount of aid among recipients was $\$ 9,423$. On average, their total aid met $46 \%$ of their cost of attendance and their expected family contribution met $53 \%$ of their costs. ${ }^{2}$

[^0]
## Federal, State, and Institutional Sources of Aid

Federal Aid comes in the form of loans, grants, and work study. At UCCS, this includes Federal Stafford Loans, Federal Perkins Loans, Federal PLUS Loans, Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), and Federal Work Study.

While Stafford Loans are available for most students, Perkins Loans are limited to students with high need, and PLUS loans are available to only parents and graduate students. Pell Grants are limited to students with extraordinary need. Thus, not all students are eligible for all types of aid and in most cases there are citizenship, residency, full-time enrollment, GPA, and/or family income standards to meet prior to gaining eligibility.

State Aid is provided via state government and includes Colorado State Grant, GearUp Scholarships, and Colorado Work Study.

Institutional Aid includes institutional and athletic scholarships.

The College Opportunity Fund (COF) for residents of Colorado is considered a part of tuition rather than financial aid. Likewise, many military benefit programs fund students' educational costs but are not always considered financial aid. Education tax credits and
 deductions also help students cover the cost of their education, but those data are not included as financial aid.

## Scholarships, Loans, and Other Types of Aid

Aid comes in the form of scholarships, grants, work study, and loans. Scholarships and grants do not require repayment and are the most desirable type of aid from the student perspective. Perkins and Subsidized Stafford Loans are also desirable because the government subsidizes the interest while the student is enrolled. The government does not cover the interest for Unsubsidized Stafford Loans but they do regulate the interest rate, which is usually better than private loan interest rates. Federal Need-Based Work Study is also subsidized by the government, but the funds are provided to institutions to cover wages earned by students. For example, an office which hires a student eligible for federal work study might see $75 \%$ of the wages provided by the government rather than covering $100 \%$ of the wages directly from their own budget.

The vast majority of aid was in the form of loans ( $62 \%$ ), followed by grants ( $22 \%$ ), scholarships ( $14 \%$ ), and work study ( $2 \%$ ). Across the U.S., the average proportion of aid provided by federal loans was $39 \%$ in 20102011 compared to $59 \%$ among UCCS undergraduates. Nearly all ( $94 \%$ ) of the loan aid in the table and charts shown below is federal loan aid.

Approximately $50 \%$ of enrolled students received a loan in comparison to $37 \%$ who received a grant and $30 \%$ who received a scholarship. Four percent of students earned a work study award.

|  | Total | Percent of <br> Total Aid | Average <br> Award among <br> Recipients | Recipients |
| :--- | :---: | :---: | :---: | :---: |
| TOTAL AID | $58,629,423$ | $100.0 \%$ | $\$ 11,172$ | 5,248 |
| LOAN | $36,449,959$ | $62.2 \%$ | $\$ 9,172$ | 3,974 |
| GRANT | $12,819,218$ | $21.9 \%$ | $\$ 4,363$ | 2,938 |
| SCHOLARSHIP | $8,440,774$ | $14.4 \%$ | $\$ 3,565$ | 2,368 |
| WORK STUDY | 919,472 | $1.6 \%$ | $\$ 3,307$ | 278 |

## Student Characteristics

## Class Level and Dependency

Detailed tables at the end of this document show the distribution of total dollar amount disbursed (Table 1), average dollar amount disbursed (Table 2), and percent of aid disbursed (Table 3) across categories of student characteristics. A selection of these data are illustrated in the charts below. The first two side-by-side charts show the amount and type of aid distributed to students by their class level. Seniors receive a relatively larger share of loan and grant aid than students in other class levels, but they tend to have greater need because they are less likely to be dependent on their parents.

## College and Residency

The resemblance of students and aid distributed by college is remarkable, indicating that aid is not concentrated in any particular college although tuition rates differ by college. The distribution by residency indicates that the bulk of work study ( $94 \%$ ) and grant aid ( $94 \%$ ) is distributed to residents whereas the bulk of scholarship aid ( $94 \%$ ) is distributed to nonresidents. Not shown are the distribution of loan aid to residents ( $87 \%$ ) and distribution of total aid to residents (88\%).

## Student Persistence

## Correlations

Whether financial aid has an impact on student persistence is often the subject of discussion. Two sets of tests can determine statistical significance: correlations and logistic regression. Significant correlations occur when two items are associated with each other often enough that it is not likely to be due to chance. The association can be positive or negative. Among the Fall 2011 freshman ( $n=1156$ ), we found several correlations to persistence to be significant at the .oo1 level, albeit each of minor strength. The "strongest" significant association to persistence was Fall GPA with a relatively weak coefficient of 370 .
Significant but Weak Correlation to Persistence:
Total Aid
Institutional Aid/Scholarships
Current GPA
Main Campus Units
Extended Studies Units (negative)
ACT Math
ACT English

Tested but not significant:<br>Federal Aid<br>State Aid<br>Private Aid<br>Estimated Need<br>Adjusted Gross Income<br>Family Contribution<br>PLUS Loans<br>Loan Aid<br>Grant Aid<br>Work Study<br>Athletic Scholarship<br>Pell Amount<br>Age<br>SAT Verbal<br>SAT Math<br>On Campus Housing (yes/no)

## Logistic Regression

Through various iterations of logistic regression with persistence as a dichotomous dependent variable, three independent variables explained some variation in persistence: grade point average, extended studies units, and whether or not the student applied for aid. Grade point average and an aid application have positive effects. Extended studies units has a negative effect on persistence ( $55 \%$ of the freshmen with extended studies hours persisted in comparison to $73 \%$ persistence among those who did not have extended studies units). For the most part, regression analyses suffer from specification error and results have limited application.

## Persistence Groups

The pie charts (below) show the enrollment status of aided undergraduate students one year later, in Fall 2012, and the amount of aid distributed to students in the enrollment categories; 62\% of aided students returned to UCCS in Fall 2012 whereas $8 \%$ transferred to another institution and $14 \%$ are "unknown" or not found to be enrolled anywhere. The remaining 16\% of aided students graduated prior to Fall 2012.

The second pie chart shows the amount of aid distributed to these groups. Note that a bigger proportion of aid (66\%) went to students who persisted at UCCS (62\%) with only $12 \%$ of the aid disbursed to students who dropped out of college. When financial aid is packaged and eventually disbursed, the Financial Aid Office does not know a student's probability of persistence. However, they do monitor second semester disbursement and academic progress, so the favorable disproportions are possibly due to changes in disbursement during the Spring semester.

Fall 2012 Status of Students<br>

## Transfers Out

Among the students known to have transferred to another institution by Fall 2012,their average aid award was smaller for each type of aid compared to students who continuted to enroll at UCCS. The proportions of each group receiving each type of aid are similar. (Remember, most scholarship aid goes to non-residents.)

|  | Transferred <br> to 2 yr | Avg Aid | Transferred <br> to 4 yr | Avg Aid | Enrolled | Avg Aid |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| TOTAL AID | 182 | $\$ 8,398$ | 209 | $\$ 10,663$ | 3,276 | $\$ 11,867$ |
| LOAN | $138(76 \%)$ | $\$ 7,505$ | $166(79 \%)$ | $\$ 9,674$ | $2,446(75 \%)$ | $\$ 9,793$ |
| GRANT | $97(53 \%)$ | $\$ 3,473$ | $91(46 \%)$ | $\$ 3,611$ | $1,785(54 \%)$ | $\$ 4,751$ |
| SCHOLARSHIP | $66(36 \%)$ | $\$ 2,197$ | $95(45 \%)$ | $\$ 2,903$ | $1,608(49 \%)$ | $\$ 3,613$ |
| WORK STUDY | $4(2 \%)$ | $\$ 2,696$ | $8(4 \%)$ | $\$ 2,299$ | $176(5 \%)$ | $\$ 3,600$ |

Aided students who transferred to another institution by Fall 2012 were mostly resident freshmen who transferred to institutions in Colorado. Approximately $6.5 \%$ of total aid awarded to undergraduates went to students who transferred out of UCCS. The most common destination was Pikes Peak Community College. The 109 students who went to PPCC had received $\$ 816,581$ in aid from UCCS, making up $22 \%$ of the aid awarded to transfers out.

| Top Transfer Institutions | Transfers | Aid Awarded |
| :--- | :--- | :--- |
| Totals | $602(100 \%)$ | $\$ 3,757,116(100 \%)$ |
| Pikes Peak Community College | $109(18 \%)$ | $\$ 816,581(22 \%)$ |
| University of Colorado Denver | $29(5 \%)$ | $\$ 351,895(9 \%)$ |
| Colorado State University | $20(3 \%)$ | $\$ 182,325(5 \%)$ |
| Metro State University | $17(3 \%)$ | $\$ 181,028(5 \%)$ |
| University of Colorado Boulder | $15(2 \%)$ | $\$ 177,350(5 \%)$ |
| Colorado State Univ - Pueblo | $13(2 \%)$ | $\$ 142,126(4 \%)$ |
| Front Range Community College | $13(2 \%)$ | $\$ 93,050(2 \%)$ |

## Trends

## State Aid Decreases

We should not be surprised that sources of aid have shifted as UCCS enrollment continues to grow during a fiscal crisis. As the number of undergraduates increased by $8.2 \%$ between Fall 2010 and Fall 2011, the sum of total aid also increased by $8 \%$; however, we see a decrease in state sources while other sources try to fill the gap, particularly institutional and private aid. Federal aid also increased due to more students being eligible for federal grants and more students getting federal loans.

Total Aid increased by $\$ 4,352,943$. The largest amount was in federal aid, increasing by approximately 3.5 million dollars. Private and Institutional Aid each increased by over half a million dollars while State Aid declined by approximately \$196,000.

|  | Change in <br> Dollars |
| :--- | ---: |
| Total Aid | $+4,352,943$ |
| Federal Aid | $+3,466,723$ |
| State Aid | $-195,999$ |
| Institutional Aid | $+525,886$ |
| Private Aid | $+556,333$ |

## Loans and Scholarships Increase

Like the sources of aid, the types of aid also shifted. Loan aid increased by approximately $\$ 4.5$ million or $14 \%$ between 2010 and 2011. Scholarship aid increased by $\$ 2.2$ million or $35 \%$. Grant aid declined by approximately $\$ 2.1$ million or $14 \%$ and work study declined by $\$ 159,444$ or $15 \%$. Most of the decline in work study aid is due to a decline in federal rather than state work study. Federal work study made up $33 \%$ of the work study in 2010 but only $24 \%$ in 2011, declining by \$129,532 or $36 \%$ among undergraduate recipients by 2011 . State work study aid declined $4 \%$.

Within the five types of loans (chart below), there was an increased distribution in all types except Perkins loans. The largest increase was in the distribution of Plus Loans, which are granted to parents to help finance their students' education. The distribution of Perkins, Plus, Stafford, and private loans as proportions of total loan aid are very similar to the national proportions ${ }^{\text {ii }}$. For example, $39 \%$ of UCCS loan aid compared to $41 \%$ of national loan aid is in the form of unsubsidized Stafford loans. UCCS does differ slightly from the national proportions as we provide fewer private loans and more Plus loans. Nationwide and at UCCS, unsubsidized loans are constituting a larger amount of loan aid than in the past.

## Pell Grants Carry On

Pell Grants continue to be an important part of financial aid packages. The comparison between 2010-2011 and 2011-2012 is somewhat incompatible due to Year Round Pell Grants. Fall 2010 students who continued to be enrolled in Summer 2011 had the opportunity to apply for an additional Pell Grant for the summer term, which led to 255 or about 11\% of the Fall Pell recipients receiving more than the usual maximum amount of $\$ 5550$ per year. The Year Round Pell program has not been funded since 2010-2011.

By 2011, the number of recipients grew by 212 students or $9 \%$ while the amount disbursed increased by $4 \%$ (approximately $\$ 350,000$ ) thereby decreasing the average award. The average award decreased by $\$ 189$ from $\$ 4040$ to $\$ 3851$.

Approximately $32 \%$ of UCCS undergraduates received Pell Grants in 2011, including $11 \%$ of undergraduates who received the maximum Pell Grant amount of $\$ 5550$. Approximately $12 \%$ received at least half of the maximum amount, and another $9 \%$ received $\$ 2774$ or less.

According to a report published by The College Boardiii, $28 \%$ of Pell recipients nationwide received the maximum amount in 2009-2010 (when the maximum was \$5350), which requires full-time enrollment and an expected family contribution of $\$ 0$. By 2010-2011, the average Pell Grant amount was $\$ 3828$ nationwide. UCCS data for 2011-2012 are similar as $33 \%$ of UCCS Pell recipients received the maximum mount and the average award among recipients was $\$ 3851$. The proportion of UCCS undergraduates receiving Pell awards ( $32 \%$ ) is also similar to that nationwide, which increased from $20 \%$ in 2000 to $35 \%$ by 2010.

[^1]
[^0]:    ${ }^{1}$ The total population of students includes all enrolled on main campus or extended studies, whether eligible for aid or not.
    ${ }^{2}$ Average total aid and EFC may exceed $100 \%$ of the cost of attendance because students can receive aid in excess of costs and because the COA and EFC can change throughout the aid year (as well as a student's eligibility and academic progress). While need determines the maximum amount of need-based aid a student can receive, the student could also receive merit-based aid.

[^1]:    ${ }^{i}$ Additional reports are posted at www.uccs.edu/ir. Data are compiled from the Fall 2011 end-of-term IR snapshot and the SURDS Financial Aid snapshot for aid year 2012.
